FAST CLEAN

Product #94040

Rapidly cleans fuel injectors and intake valves to reduce emissions and improve drivability.

THE PROBLEM

Over time, fuel systems develop carbon and other deposits that create drivability problems, such as rough idling, knocking and hesitation. In addition, a dirty fuel system causes increased emissions, decreased performance and reduced fuel economy.

THE SOLUTION

BARDAHL PRO® Fast Clean is formulated with the latest PEA (Poly Ether Amine) fuel additive chemistry to remove harmful deposits from the injectors, intake valves and combustion chamber. This solution provides a “one tank” clean-up of the fuel injectors and intake valves that improves drivability, restores power, reduces emissions and improves fuel economy. It removes combustion chamber deposits to reduce pre-detonation or spark knock due to an octane requirement increase (ORI). The formulation contains no alcohol and is safe to use in all gasoline and ethanol blends up to E85.

THE BENEFITS

- Removes carbon deposits, varnish and other deposits from the injectors and intake valves
- Reduces drivability problems by eliminating stalling, hard starting and rough idling
- Improves fuel economy, restores performance and decreases emissions
- Removes combustion chamber deposits to reduce spark knock
- Can be used to help pass an Emissions Test

DIRECTIONS

Add one bottle to the tank prior to filling-up with fuel. One 11 ounce bottle treats up to 20 gallons (75 liters) of gasoline. Use at every oil change or at 3,000 mile intervals. Dispose if any used or unused solution and container in accordance with the local, state and federal regulations.

Product Specifications

Product #	94040
Unit UPC#	0 76906 94040 5
Case UPC#	30076906940406
Pack Size	12x11 U.S. fl oz (325 mL)
Dimensions	L x 11" W x 8" H 8.5"
Weight & Cubic ft ³	10 lbs / 0.43 ft ³
Color	Light Amber
Specific Gravity	0.860
Viscosity	N/A
Flash Point	>141°F / >60.5°C
