# DIESEL EGR RINSE

Product #94360

Diesel EGR Rinse is the second step of a 2-step service that safely and efficiently removes soot and carbon from diesel engines with EGR systems.

## THE PROBLEM

Carbon deposits build-up and cause improper EGR valve operation, sticking vanes in the turbocharger, and blockages in the EGR cooler and DPF/catalyst. These deposits cause drivability problems and reduce power, performance and fuel economy.

## THE SOLUTION

Bardahl Pro Diesel EGR Cleaner & Diesel EGR Rinse are each a part of a 2-step process designed to clean EGR valves, turbochargers, intake manifolds, EGR coolers and DPF/catalysts. The rinse is a water-based solution that is designed to be used after the cleaner to remove any cleaning residue or remaining deposits and to coat all metal surfaces with a rust inhibitor.

## THE BENEFITS

- Restores proper EGR valve operation
- Loosens sticking variable vanes in turbochargers
- Removes blockages in EGR and exhaust systems, including the DPF/catalyst
- Cleans entire induction system including intake valves and combustion chambers
- Restores power, improves performance and increases fuel economy
- Safe for use with all diesel emissions control systems, including DPF's and catalytic converters

## DIRECTIONS

The cleaning and rinse solutions can be applied in a 2:1 ratio or 1:1 ratio of cleaner to rinse depending on deposit severity. Use either a diesel EGR canister delivery system or a Diesel EGR cleaning machine that can accommodate a 2-step process and water-based chemicals. Follow the instructions of the equipment manufacturer regarding how to connect the canister or machine to the vehicle and properly use the solution to conduct a professional service. The EGR cleaner must be applied first and run through the engine, followed by the EGR rinse to remove any residual cleaner and condition the system. An oil change is recommended after conducting this service. Perform the service every 15,000 to 30,000 miles or as recommended by a technician. Dispose of any used or unused solution and the container in accordance with the local, state or federal regulations.

## Product Specifications

Product #	94360
Unit UPC#	0 76906 94360 4
Case UPC#	3007690694360 5
Pack Size	12x32oz (0.946 L)
Dimensions	L x 18" W x 9" H 9"
Weight & Cubic ft <sup>3</sup>	29.5 lbs / 0.84 ft <sup>3</sup>
Color	Light Blue
Specific Gravity	1.010
Viscosity	N/A
Flash Point	N/A
