COMPRESSOR CARE

Product #94560

Restores air conditioning performance and prolongs life of compressor parts

THE PROBLEM

The high-pressure along with the design of the air conditioning system spreads out refrigerant and lubricant instead of pooling in a sump, which leads to periodic seeping and loss of volume over time. A reduction in refrigerant and lubrication causes diminished performance and more wear on the compressor, as well as less efficient operation.

THE SOLUTION

Bardahl Pro® Compressor Care helps to keep properly functioning compressors running at peak performance by supplying a small amount of lubricant and refrigerant keeping the system topped off and running at optimal efficiency.

THE BENEFITS

- Enhances A/C system efficiency
- Decreases interior temperatures
- Reduces the impact of 'oil fouling'
- Extends the life of the system
- Improves overall performance
- Easy installation

DIRECTIONS

Start engine, leave in park, set A/C to maximum cold position. Shake well. Attach hose to can with retracted piercing valve. Attach other end to suction port. Unscrew can slightly to remove air. Retighten can, turn upside down (valve down), then puncture can with piercing valve. Allow 1-2 minutes for installation. Close piercing valve and remove hose from suction port. Reinstall port cap. Leave can attached to hose until next installation to prevent contamination. All used and unused product must be disposed of in accordance with federal, state, and local regulations.

Product Specifications

Product #	94560
Unit UPC#	0 76906 94560 8
Case UPC#	30076906945609
Pack Size	12x2 U.S. fl oz (59 mL)
Dimensions	L x 9.25" W x 7" H 5.5"
Weight & Cubic ft ³	3.9 lbs / 0.21 ft ³
Color	Colorless / Light Yellow
Specific Gravity	N/A
Viscosity	N/A
Flash Point	>200°C
